Well last night I ordered

1- H290s and 1-Selenium HC23-25.

I'll try them both and see who wins. The Selenium HC23-25 is odd looking but it seems to be the best selling horn at Parts Express. There are bunches of comments on how nice it sounds and well it images and isn't too agressive even on axis...it goes really low and it was cheap.

Have you heard that horn Wayne? Anyways looking forward to trying the two horns out.
