Wayne, I was planning on lining the cabinet with some extra 2" compressed wool, it has similar coefficient factors as Owens Corning 703.

<http://www.atsacoustics.com/item--Roxul-Acoustical-Fire-Batts-Mineral-Wool-2-inch-Case-of-6--1006.html>

I used this for my DIY acoustic panels and have 3 or 4 sheets left over. Would this be better than R13?
