My coils for the Alpha 8a finally showed up. These "little" 1 PI speakers are cranking out some fine sounds. Just for fun, after I corrected the crossover, I brought them into the living room and placed them in a system with a Morrison preamp and Transcendent Sound single ended OTL amp. My wife preferred them to a highly rated speaker & so did I. I'm leaving them in the system and can't wait to mess with the heads of a few audiophile friends.

Thanks again Wayne.

Steve
