Adveser wrote on Sun, 14 November 2010 20:14I would go out and buy a MIDI interface for your computer and the cheapest possible Keyboard to go with it and use computer software. I don't have anything specific, really.

Thanks for the suggestion... something I hadn't even thought about and will do more research. Also thanks to you Wayne for suggesting the websites. I was surprised to see how much prices have fallen. When I first started looking about 3 years ago, good boards were at least $300. I am glad to see less expensive options, and it makes more sense to start out at $100 rather than $300.
