Hi everybody, I wanted to ask a question about something I saw at a friend's house a while back. He had what seemed to be a sub hooked up to his computers and speakers that had little tweeters built in - it was an amazing setup and I didn't think to ask about it at the time, and now I wish I had. I want a setup like that and I want to ask for the stuff for Christmas from family. Anyone know what I should be looking for and directing people to? Is that kind of thing easy to set up?
