I think that we are better off putting the TV on the other wall, the wall that separates the room would not work - it splits the room so there is not a lot of room to put the couch or chairs in that direction. I'm thinking a Big screen (flat) TV on the far wall and the seating against the other far wall. I would say the room is 12 feet wide and 50 feet long (just an estimate). The walls are concrete (except the wall that separates the room in 2).
