I just bought one of the new Ford Mustangs as a new car. The car is great, but I'm not happy with the sound system. A friend of mine told me the best one to put in is the Pioneer DEH-2200UB CD Player (CD-RW - MP3, WMA, AAC, CD-Text - LCD - 4 - 200 W - AM, FM).

Has anyone out there had any experience with this product and could you make a recommendation (good or bad) on this choice.

Thanks.
