Adveser wrote on Sun, 12 December 2010 14:11FYI, yeah I was wrong. Still Class A/B.

I'm happy with it for gigging purposes, but something is not right with it. When I plug the headphones in, the stereo image is separated and should be mono. You know, like with cheap headphones where the image doesn't quite merge into one. I wonder what that could be from.

Sounds like the headphone jack may be wired out of phase.
