Wayne could you please send plans for the 4pi and 1pi. I am using them for a 7 channel dedicated theater room, with acoustical treatments. Main LCRs are behind an acoustically transparent screen, close to flush on the wall. I only have 18" behind the screen.

Room size 19.25' long x 15.75' wide by 7.25' high. Two rows of seats.

Are the 2pis much bigger than the 1s? Or will 1s work fine?

Thanks much.
