I am contemplating selling my ART Arrays to try some other types of speakers. I don't have room to experiment unless I start unloading some other gear,so.....

If you want to see what they are all about, here is the link:

Here are some pics of mine. The cabinets were built by FredT (the original designer)and stuffed by me. They are in excellent shape as are the drivers. The crossover board can be switched between 1st order and 2nd order on the board. More or better pics on request.

I'm thinking \$600 for the pair, local pickup (Amarillo, TX) or I'd be willing to travel 100 miles for delivery. Shipping is not an option. I can also deliver them to Dallas at LSAF in May.
