Subject: 2pi studio Cab question
Posted by justphil on Sun, 16 Jan 2011 16:07:34 GMT

Can the cabs be rounded over without any loss? If so how much could/should I round over?

Is the hard cardboard used for the port slid into the 2" opening I am going to cut? If so what can be done to make it look nicer on the outside of the cab?
Is the port supposed to be suported in any way inside the cab?

Are the drivers supposed to be recessed?
Thanks for any and all info =) I got the cab put together and am going to start on the baffle soon.
Very excited =)
