Hi Wayne,

After 5 years of superb music listening with your Theater 4 project, I decided to build a center channel to match with, in order to add a video section to my setup. As I have little space between main channels, I'd like to build a hi-eff smaller speaker with a good tonal matching with my old Theater 4. Are Studio 1 or two a good choice, or it would be better to go with the same Eminence compression driver? Many thanks in advance,  
Vincenzo
