Yes that's some quick radio stuff I found. The master, far as I know of archiving radio performers is Tom Konard at aircheckfactory.com. he's been doing that since 1976.Since I don't follow pop music, I really couldn't make anycomment on the titles you posted, except for recognizing someand not others.There's not the really good Jackie and Roy around and hasn'tbeen for many years.George Russell was a guy Bob was playing on the jazz showand it really stood out. Bill Holman does that favorite track on 'What's New?" but I've said quite a bit aboutthat before. Other bands are ones like the Vanguard Jazz orchestrafrom the Village Vanguard. Bob Brookmeyer has become a composition teacher and he has done some things for thatband since Thad Jones and Mel Lewis have passed.I also like the newer bands of John Fedchock, Bob Minzerand Rob McConnell. Maynard Ferguson is still touring tohigh schools and small venues. A rare find of his called"The Waltz" I managed to find in the statewide library collection.That goes through my head on a daily basis for \_years\_.We've covered the swing and pop scene but we haven't touchedthe classical or ska or folk scene hardly at all.
