Hi Wayne,

Please if you could, send me the 4 pi plans. A couple quick questions. Is the 4pi 4 or 8 ohms nominal? How about the individual drivers?

Also, I may have access to some JBL 2226j drivers. These are the 16 ohm spec. Can these be used in a 4 pi, and if so what needs to be done, if anything, crossover or tweeter wise to make this work? I'm seriously considering building these if these 2226j woofers can be made to work.

Thanks in advance for any info you can provide.
