Subject: Re: Audio format converter? Posted by miss zoey on Tue, 01 Mar 2011 06:05:45 GMT View Forum Message <> Reply to Message

There are two formats that I tried. First is the amr format that my friend used to do recordings from her phone and it just comes out as fast forwarded sound.

I also tried mp4, but audacity said it was too advanced and it couldn't read it. Help please! We need this for our video project and we can't edit them if audacity can't read them
