Subject: iPad 2 - is it worth it? Posted by falloutgirl on Thu, 03 Mar 2011 18:40:17 GMT View Forum Message <> Reply to Message

What do you guys think about the "upgrades" on the iPad? I'm not really a fan of apple but it's undeniable they're the front-runners in the tablet industry. I do think that the upgrades they made on the iPad are a bit pointless, like two cameras instead of adding an sd slot/usb port. But what do you guys think about the iPad 2? Worth it? Or wait for iPad 3 to come out?
