Wayne: Thanks for the 4pi plans. Are there any know modifications to reduce the depth of the speaker to ~10.25. Can the width or height be altered to achieve a speaker with less depth?

Below is an example with just altering the height:

H W D Total

26.5 18.5 14.25 6986.06

36.75 18.5 10.25 6968.72

-17.34

Thanks
