Subject: Wayne, which speaker for PA tops?

I am considering building some PA mains to go with some equipment my buddies have for a bar band. Which speaker do you recommend for us? One of the guys has a pair of Peavey 18" subs, and I have a variety of Crown and QSC amps to drive them. This is a rock / Blues band in smaller venues of about 1000 - 2000 square feet. We mic the drums and guitar, and the Bass runs through a direct box to the board, so the mains need to be able to support these with the subs taking everything from about 150 down. No keyboard or horns. Let me know what you think. Thanks.
