I've ordered a pair of crossovers and can't wait until I get them to begin the try-outs. I guess the R1/R2 values should be altered to better match the 2227's higher sensitivity?

When it comes to horns: Is throat design, dispersion, length and width what You should look carefully at when searching for suitable alternatives to H290? It's an esthetics thing...

Very interesting information in the papers You provide. Thank You.

Regards from Sweden!
