I just realized something. you typed 16Khz. Are you sure it doesn't say 1.6Khz? I've seen that one a lot and it fits the sequence you put them in.

If so, That one is in the middle of the "nasal" sounding 1Khz and the "Presence" at 2Khz. If you reduce it too much it will suck the life out of the recording. Too much and it will sound like a telephone with like a fuzzy kind of "Caw" sound that arabic and jewish people make.
