As I recently bought this amp, I would be very happy if another owner of this preamp would be so kind to share whatever info he has about this amp. The schematic of it would help a lot.
The former owner of it "modified" a lot and I'm afraid it wasn't an improvement on the original design. Therefore I would like to bring it in the original status to judge what it was meant to sound like.

It would be great if anyone could help me. Hope George's offer is still valid.

Thanks a lot in advance.

Frank
