Hi Everyone, As you can see, I work with and design with tubes. I share a site on the sponsored links (Oddwatt Audio) with another diyer. For commercial inquiries, please go there. Here I plan on just being a diyer. I'm always glad to help and have accumulated some understanding of tubes over the past 5 decades. I love design (it is what started the OWA company) and appreciate unusual ideas. You know them, the things that "everyone" says can't work. Glad to be here. At present many of the previous designs and projects are resident on the diyaudioprojects.com site but in the future I'll try to put them on both.
