Hi Everyone, Come see some of our kits (built of course so you can hear them) at LASF. Full line, valve line stage preamp (I may bring my reference remote controlled one too just for grins to show how you can customize them), a pair of KT88 mono blocks or two, a Poddwatt (stereo push-pull class A U/L EL 84 integrated amp), a budget kit (Alpha, pentode SE U/L 6GV8 stereo) and if I can pretty them up a little, a pair of prototype KT120 Class A PP U/L mono blocks (they have a really awesome sound). We look forward to seeing all the good things everyone else is doing.
