Hi All, Absolutely, I moved my system from one room (spouse took it over for HT use . So I took over the room she vacated - the living room. High ceilings, hard floor (ceramic tile) sheetrock walls (two over top of brick) I think you get the picture. Reflections galore. Careful use of thick rugs, furniture, wall hangings and speaker placement finally did the trick. It was complicated as I use Martin Logan ESLs. They need to reflect.
