Thanks, but I already have "Closer" on both vinyl and CD, the first album on CD, posthumous "Still" album on CD, some compilations on CD, even "Love Will Tear Us Apart" 12" single on vinyl... Their 12" singles are interesting, both musically and for collectors...Well, me and some of my company back then really liked them...just remembered on guy who has all of their records, even rarities...And another, who stood on the trolley car station listening to the "Still" album on his walkman for hours...till the batteries died. Of course, he forgot that he actually went somewhere... This was the passion, but of course it was about 25 years ago...
