Clueless, it's good to see that I'm not the only one interested in 3D TV's.

Maybe I'm wrong, but just because this was done poorly many years ago doesn't mean it's a terrible idea now. The technology has to have improved since the past. I personally haven't had a chance to watch a new 3D TV yet, but if it's been done well I'm curious to see what it's like.
