Hy everybody from Croatia (Europe)
I'm new on forum and I feel it is correct to introduce myself!
Name is Mladen, heard good stuff about audioroundtable and my curiocity lead the way trough registration.
First heard of you guys when get interested in Pi corner speaker.
For now will just sniffing around , and aventualy bother with questions.
Interested in DIY hifi, but I'm not in anny way expert. More the guy who can connect someone elses dots.
My greatest achievement in that field so far is puting thermionic tubes in analog part of my 23 y. old CD player. ....but it works - just fine enough for me.

If I misspell something feel free to laugh! I deserved it...
However, pretty sure my English is just a little bit better then your Croatian.

So far so much of me!

See you in other threads!

Mladen
