Hi Wayne,

I'm still here... and still waiting to receive an invoice from the chap at Pro Sound Service in the states

I don't suppose you'd sell me a pair of the DE250 comp drivers

I'm going to try and give the cabinets a little bit of Tannoy Prestige line character. I haven't decided which speaker yet, but if I choose one that I think may have an adverse affect I will ask you before planning. Bare in mind this is purely an aesthetic and internal dimensions will remain the same, as will driver location. I cannot see a reason for external dimensions to alter either, aside from 4mm in H/W/D due to the 16mm material.

Cheers

Ken.
