Subject: Re: MTM series or parallel Posted by Wayne Parham on Fri, 10 Jun 2011 13:01:54 GMT View Forum Message <> Reply to Message

Wiring in parallel increases the overall sensitivity, so if your mids are lower in SPL, then that's the way to go. Series increases the maximum voltage since the two form a voltage divider so if the mids can't handle much power, wire 'em that way. I wouldn't say I have a "preference", but that's the difference so if the specs lean one way or another, you can adjust accordingly.
