Subject: 4Pi Port Options
Posted by tgaffner on Sun, 12 Jun 2011 01:30:51 GMT

Hello everyone,

I am in the process of building 3 4Pis. The center is going to be sealed, so there is no concern there. However, I am curious about the ports for the left and right channels.

How many different options are there? As far as relocating them, going to a round port, 2 ports, so on and so forth.

So basically if you have any ideas on altering the port from the stock plan, please tell me what they are, how you did it, and how did it work.
