Hi vinyl listeners. As promised I have the phono preamp at a stage where I feel comfortable in posting it. It has gone through many iterations and now sounds like I think it should. It is not a simple project but neither is it super complex. The write up and photos are fairly extensive and I am not sure how to get it out to you all. It is 1.8meg and should fit here. I will give it a try. It says it went. Comments are always welcome and I owe an Oddwatt "T" shirt to Shane for coming up with the name. If he will PM me his address I'll be happy to send it. I hope large is OK.
