I actually already did make a mock up of both 4Pi and 3Pi out of popcicle sticks (the kids helped) and this is the direction I am allowed to go. Also I do prefer the look of the 4Pi over the 3Pi (as does the wife) and the 15" drivers for the 4Pi I'm liking as well. As for subs I am going to go with an avs forum member's design (lilmike cinema f-20) two of them.
