Subject: Setting 4pi LCR upside down in theater? Posted by dutchswan0311 on Tue, 19 Jul 2011 18:04:47 GMT

The bottom of our 180" AT screen will be about 6' off the floor. With a 45 degree vertical dispersion, can I lower my horns to hit more of the audience by flipping the 4pis upside down? Someone over at the AVS forum recommended this to me.
