I've posted before that you can't do better than the Pomona Tellurium Copper binding posts, especially now that the Edison-Price are no more.

<http://www.alliedelec.com/catalog/pf.aspx?FN=447.pdf>

You want the Model 3770s at Allied. No nickel, no brass, and it's audible to me as I've A/B'd with the gold Dayton's. I buy the \$4 round plastic cup terminals from PE, remove the terminals and replace them with the Pomomnas, an exact fit.
