Hey everyone...

I am building 4pis and 1pis as a part of a dinner theater, but have decided to also build a pair of 3pi speakers for our stage. My other pi builds are to spec and are just being painted black, as they are either fully or mostly concealed from view.

The 3pis, however, will be very prominent on the stage, most likely on pole stands. I want to take extra care in making these look beautiful. I thought I would create this thread for those who have already built a 3pi to post a picture of their cabinet, and maybe even provide a description of how they customized the enclosure for their 3pi. Thanks in advance to anyone who participates in giving me ideas!

(Wayne, may I have the plans for the 3pi? Thanks again!)
