That is one nifty-looking speaker. I'm not much of a "nerd" is the Rubik's Cube sense myself, but I still think it looks cool, it's nicely designed and close to the real thing. As some of you said, though, its sound quality probably isn't too great, but it probably would be a nice thing for show. Like probably a cool accessory for a room, which decently works, too. I have yet to find a really good speaker myself but I don't like spending too much money, so these mini speaker type ones usually suffice for me.
