Subject: Re: 1pi or 2pi for surrounds? Posted by smokarz on Tue, 16 Aug 2011 17:32:29 GMT View Forum Message <> Reply to Message

wayne,

what's your thought on using non horn/wg surrounds with horn/wg mains?

i kept hearing debates that for best integration (timbre match) with horn driven mains, surrounds should also be horn driven (or coax).

i mean, they're just surrounds right? how much dynamics and directivity do you need from surrounds?

what's your personal take on this? do you use dome tweet as surrounds in your system?

thanks much!
