Subject: subwoofer use for old cabinets

A question for you guys: Would it be worthwhile to hook up my old Theater 4s without the horn and low passed to augment the bass from my JBL 4 pis? I'm mostly interested in managing room anomalies much in the way Wayne suggests using multiple subs. Any suggestions would be appreciated. I have the original Eminence Deltas and also Omega Pros for the large cabinets. The room is 16ft x 20ft x 8.5ft. Wood framed.

Thanks!

Garland
