I just watched Dead Man's Chest tonight. It's ok but too long and far fetched. I realize it's a hollywood fantasy but this one is a little over the top for me. The first one you could say possible to a lot of the scenes or they added to the movie. This one just went too far in my opinion.I think it's worth seeing though if you like Depp's character and the dialog. The good news is you could see the third movie coming early on and guess who's back in action in the third one? They filmed number 2&3 at the same time.
