Hi Wayne,

I have not started on my Pi 7's yet, but I was wondering, how difficult would it be to use AE drivers on this design? Would it make a difference or would there be an advantage to just doing the 15" or would using AE's in the 10" also be viable? Is there a reason you didn't provide the AE's as an alternative for the Pi4's and Pi7s?

Thanks
