Hi Everyone, It's the mad (or demented) audio guy with some ramblings about phono preamps. I was sort of prodded into to comparing a kit phono preamp to one I already had. Being the curious person I am, I decided to compare all six of the ones I had easy access to. A bad move in some ways as it was a lot of work and it is difficult to be objective when one is my own design. I call that the proud papa syndrome. Anyhow I did it and the results are attached. Some interesting results and conclusions.
