Wayne,

Hi! I'm itching for long time now to build the 12pi basshorns of yours. Is it possible to have a copy of your plans. Thank you.

Also, is it possible to use this cheap subwoofer (JBL GT5-S12 made in china) for this sub. all I can find are these parameters:

JBL GT5 BIG high end features:

- * Rubber coated tinsel leads
- * Heavy duty 2inch tougher high temp voice coil
- * Double large slugs magnets w/ rubber boot
- * High excursion bigger rubber surrounds
- * Ultra large 7" 1/2 long excursion conex spiders
- * Visible voice coil from see through vent windows
- * Thicker stronger metal basket
- * Stiff, none flex, light weight polypropylene cone material
- * immune to bottom out. aka voice coil slapping or plak plak sound.
- # Impedance: Single 4 Ohm QUAD layer coils!
- # Frequency response: 23-450 Hz
- # Sensitivity: 93 dB

Speaker Thiele Parameters Specs:

- *Frequency Response
- 23Hz 450Hz
- *Sensitivity
- 93dB
- *Impedance
- 4 Ohms
- *Power Handling, Peak
 - 1100W
- *Power Handling, RMS
- 275W
- *VMAx
 - 14,2mm
- *Mounting Depth
 - 164mm
- * RMS: 275 watts
- * Peak: 1100 watts

| Again. | thanks. |
