Hey Lon; nice stuff. I have to say you always have something going on intellectually speaking thats of interest. So aside from the HBO series of which I am familiar; I like "The Wire", out of all of them best; oh and "Weeds". What is on the boiler plate movie-wise? Right now I have a couple episodes of "The Rise And Fall Of Reginald Perrin", on the tube. I plan on ordering all of the seasons; it's just that funny. The Office is another of my favs.
