Thanks for the info, Wayne. I really enjoyed listening last night; the family was away for a while so I could really crank it up and play some real ROCK! Green Day's American Idiot, The Yes Album, The Eagles all sounded hugely dynamic at levels at which I'm glad I don't get to listen very much. We do need to save our hearing esp. at my age edging up into the 60's!

Soon I'll rig up my old Theater 4 boxes with Omega pro 15s as subs. That should be interesting!

Thanks again!

Garland
