Hi Wayne,

You had previously sent to me the 2Pi and 4Pi speaker plans a number of months ago. Unfortunately the computer I had the plans saved on crashed and that data was lost. I have reevaluated what I want to do for my next setup and am leaning towards doing a 2Pi CC, 2Pi L/R and 1Pi Surrounds. I will power them with my Onkyo 706 and integrate my MFW-15 Sub.

Could you please email the plans for these three speakers?

I also have a question about the 1Pi and 2Pi speakers: In looking through the kits I don't see a crossover for either speaker. Do they have a crossover?

I am wanting to start a build once the weather warms up here in Utah. Can't wait!

I appreciate all you efforts in this regard.

Thank you,

Aaron
