gofar99 wrote on Wed, 08 February 2012 13:11Hi, I can actually think of two good reasons to not keep everything in the cloud. One the host goes belly up and files for chapter 11. Also as was pointed out to some folk at last years audio fest in Dallas... bandwidth problems. They were unable to download the stuff in real time. having it stored on a server in your own house is likely a good thing. At least keep a backup copy there. Drive space is now really cheap.

Why were you thinking about cloud storage verses local storage? What brought that to mind?
