## Subject: 4 Pi - Horn to middle of baffle? Posted by audiothings on Thu, 09 Feb 2012 01:58:16 GMT View Forum Message <> Reply to Message

Hello,

If I wanted to use the 4 Pi for LCR duties, is there is any way for me to bring the horn to the middle of the baffle directly above the LF driver, for the center channel? I understand that the woofer being slightly offset from the center will probably not be a big problem sonically, but I'd like to know anyway...

Thanks, Jai Shankar.
