Can you give me a link about panel absorbers?

As far as the room rebuild, I think I'm going to need to knock out an existing wall to get the large rectangle I need.

Even though the house I pick will be five years or less old, even 2500 sq feet won't get me there. The mold they use to stamp out houses today parcels them into a lot of small rooms, or rooms that have inconvenient doors or angled walls, etc.

This (better damn well) be my last move. I'm not going to be interested in re-sale (I'm 65), so I can change a lot of things to suit my wife and I.

Any links or references to room treatments in general for sound?

Floyd
