Thanks Wayne,

I didn't want to have to take the thing apart and remove the resistor. It is easy to mar the case even with the proper plastic pry tool.

It keeps me from having to change the volume back and forth between car and bike (and jumping a foot if I forget to turn the volume down with the earbuds).

You said someone (named Bruce, I think) made amplifier tube kits.  
Does he have a web site or a catalog?

And, looking at the third woofer option for the Three Pi, I see a number and the words "plus Atlas."  
Who is Atlas, a guy who helps hold the woofer in place (snicker)?

Floyd
