I see, spacers for the flanges on the grill clamps? These? http://www.parts-express.com/pe/pshowdetl.cfm?AID=10500969&PID=1941119&Partnumber=260 -352&scqty=1 or maybe these: http://www.parts-express.com/pe/pshowdetl.cfm?AID=10500969&PID=1941119&Partnumber=260 -340&scqty=1

To raise them high enough to work ... I think I get it. The cut sheet I downloaded from Eminence shows a thick gasket on top of the woofer frame. But I can't see if there's also one below. Anyway, I will know in a few days.
